60 Days Training Program

"Python: Changing the way you code."

IIHT Jaipur believe that upskilling is mightier than massive layoffs. And not just us, but countless companies attest to it and have adopted this approach in their businesses as well. The domain expertise these upskilled individuals bring in is what sets them apart. We focus on nurturing these aspects. So, whether you are a student in college or a fresh graduate entering corporate, we have something for you to offer.

We are an online and offline training institution that provides students and professionals with courses in high demand. We provide training in a vast array of technologies, including Cloud Computing, DevOps, Cyber Security, Full stack development, Data Science, Digital Marketing, and Web Development, among others.

Python covers the principles of the language as well as how to apply it to various applications in the real world. The modules, projects, and assignments that make up the curriculum cover data operations in Python, strings, conditional statements, error handling, shell scripting, web scraping, and the Python web framework Django, which is widely used.
